EDUCATION

Universidad Autónoma de Baja California

Bachelor of Engineering in Software and Emerging Technologies

Ensenada, Baja California

July 2026

EXPERIENCE

Skill Up Leader Holding AG

Remote

Software Engineer Intern (Full-time)

June 2026 – Present

- Promoted to full-time after four months; translated stakeholder requirements into product design, delivering 50+ high-fidelity screens for a new product with direct stakeholder feedback.
- Turned early ideas into low-fidelity designs so stakeholders could visualize and validate the new product before development.
- Ran QA cycles for web releases, catching defects before production, including cross-tenant security vulnerabilities.
- Authored and maintained ISO 27001 and SOC 2 documentation with the compliance team.

Software Engineer Intern (Part-time)

February 2026 – May 2026

- Created 3 ISO 27001 and SOC 2 policies, laying the groundwork for the company's compliance program.
- Updated and restructured technical documentation, reducing onboarding friction for the team.
- Supported product design and QA testing during the product's early development.

Tech4Good Lab

Baja California, Mexico

Machine Learning Intern

January 2025 – November 2025

- Conducted data analysis and preprocessing on multiple facial expression and emotion recognition datasets.
- Designed and implemented deep learning models for facial expression and emotion recognition.
- Applied bio-inspired optimization algorithms to enhance model performance and convergence.
- Performed comparative evaluation across multiple datasets to assess accuracy, robustness, and generalization.

Healthcare Robotics Lab

San Diego, California, United States

Research Assistant

July 2025 – August 2025

- Documented robotic system code with detailed diagrams to improve maintainability and scalability.
- Designed and enhanced custom Blockly blocks to extend robot functionality and improve user interaction.
- Refactored the existing codebase to enhance performance by approximately 25%, as well as improve readability and modularity.
- Implemented sound effects in both CARMEN and PODER social robots.

AWARDS

Honorable Mention, Hackathon Elegis-Tech 2025-1

March 2025

- Developed **LegisConnect**, a platform to strengthen communication between citizens and legislators, enabling initiative proposals, feedback, and real-time tracking of legislative activity
- Implemented backend functionalities and web scraping features to support the platform's operations and data tracking

Local Winner & Global Nominee - Nasa Space Apps Challenge

September 2025

- Implemented and Deployed Retrieval-Augmented Generation (RAG) services using NestJS.
- Designed and deployed vector databases to enable semantic search capabilities using Google Cloud Services.

TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript, TypeScript, Python

Frameworks & Libraries: React, Node.js, Next.js, Bootstrap, FastAPI, Prisma

Tools & Platforms: Visual Studio, VS Code, Git, GitHub

Operating Systems: Linux (Arch, Ubuntu), Windows

Languages: Spanish (Native), English B1 (Intermediate proficiency)

CERTIFICATIONS

- Google Data Analytics Certification
- Programa Oracle Next Education F2 T6 Back-end
- Formación Java y Spring Boot G6 - ONE
